PROFESSIONAL SUMMARY

Junior Data Analyst and B.Tech Computer Science & Engineering graduate (2026) skilled in Python, SQL, Tableau and Excel. Hands-on experience in data cleaning, exploratory data analysis, SQL querying, dashboards and reporting through a Data Analyst internship, academic projects and job simulations with Deloitte Australia and Tata. Seeking Data Analyst, Business Analyst or BI Analyst roles. Immediate joiner.

SKILLS

Programming & Databases: Python, SQL

Data Analysis & Libraries: Pandas, NumPy, Exploratory Data Analysis, Data Cleaning, Data Preprocessing

BI & Visualization: Tableau, Microsoft Excel, Data Visualization, Dashboards, Reporting, Business Intelligence

Languages: English (Fluent), Hindi (Fluent)

EXPERIENCE

Logistics Data Analyst Intern | Yuvaintern Jul 2026 – Aug 2026

- Completed 4 weekly deliverables applying Python-based data science to logistics problems, from data preprocessing to predictive modeling.
- Cleaned and analysed a simulated logistics dataset using Python (Pandas), resolving missing values and outliers.
- Built 5+ visualisations showing trends in delivery times, shipment volumes and costs.
- Built and evaluated a predictive model to forecast a key logistics metric; proposed 2-3 optimisation strategies for resource allocation and route planning.

PROJECTS

Customer Shopping Trends Analysis Python, SQL, Tableau

- Analysed 3,900 retail transactions across 4 product categories; cleaned data in Pandas and imputed 37 missing Review Rating values using category-wise medians.
- Wrote 10 business-focused SQL queries and built an 8-visual interactive Tableau dashboard; found that 35% of revenue came from the loyal customer segment/clothing category.

Blockchain Based Money Laundering Detection System (Major Project) Python

- Analysed simulated blockchain transaction data with rule-based logic to flag anomalies, including ring and layering detection and SAR report generation.

Stock Market Prediction Model (Minor Project) Python, Machine Learning | 2024

- Cleaned and visualised historical stock data, then built and evaluated a machine learning model; summarised findings in written reports.

VIRTUAL EXPERIENCE (JOB SIMULATIONS)

Deloitte Australia Data Analytics & Forensic Technology Job Simulation | Forage Jun 2026

- Processed ~160,000 telemetry readings (4 factories x 9 machines) in Tableau and built a downtime metric to flag the highest-downtime factory and device type.
- Classified pay-equity scores into a 3-tier rubric (Fair / Unfair / Highly Discriminative) in Excel and wrote up forensic conclusions.

Tata Data Visualisation Job Simulation | Forage Jun 2026

- Built Tableau dashboard visuals for a business scenario, selected the best chart type for each insight, and delivered a recorded briefing for CEO- and CMO-level needs.

INDEPENDENT MARKET & INVESTMENT RESEARCH

Self-Initiated Investment Research Venture 2024 – Present

- Ran market activity as a self-managed business for 2+ years: set objectives, defined risk limits, sized positions and reviewed results on a regular cycle.
- Analysed price charts, economic indicators and macroeconomic news to spot trends, tested strategies, and kept a trade journal to track win rate, drawdown and risk-reward.
- Gained business understanding of risk management, cost-benefit analysis, KPI tracking, forecasting and capital allocation, all directly applicable to data and business analysis.

Skills: Trend Analysis, Risk Management, Performance Tracking, Forecasting, Data-Driven Decision Making, Report Writing

EDUCATION

B.Tech, Computer Science & Engineering | SRM University, Sonipat 2022 – 2026

Class XII & Class X (CBSE) | South Point Public School, Sonipat 2022 & 2020

CERTIFICATIONS

Python 101 for Data Science, IBM (CognitiveClass.ai), Jun 2026 | SQL (Basic) Certificate, HackerRank, Jul 2026
