

# HARSH

Sonipat, Haryana | +91 99918 49373 | harshantil2026@gmail.com

## PROFESSIONAL SUMMARY

Computer Science & Engineering graduate with a strong foundation in data analysis, structured problem-solving, and evidence-based decision-making. Experienced in turning raw data into clear, actionable insights using Python, SQL, and visualisation tools such as Tableau and Excel, gained through academic projects and industry job simulations with global organisations. Brings dependable written and verbal communication, close attention to detail, and the self-discipline to manage long-term, independent work under ambiguity.

## CORE SKILLS

**Programming & Data:** Python, SQL

**Data Analysis Tools:** Tableau, Microsoft Excel, Pandas, NumPy, Apple Numbers

**Core Strengths:** Data-Driven Decision Making, Written & Verbal Communication, Problem-Solving&Troubleshooting, Time Management & Deadline Adherence, Attention to Detail, Resilience & Consistent Output, Fast Learning

**Languages:** English (Fluent), Hindi (Fluent)

## RELEVANT EXPERIENCE

**Tata Data Visualisation Job Simulation** | Forage (Tata iQ / Tata Insights & Quants) | June 2026

- Completed a 4-part simulation translating a business scenario into stakeholder-ready analysis, from framing discussion questions to selecting the optimal chart type for each insight
- Built dashboard visuals in Tableau and delivered a recorded briefing addressing both CEO- and CMO-level information needs

**Deloitte Australia Data Analytics & Forensic Technology Job Simulation** | Forage | June 2026

- Processed ~160,000 telemetry readings (4 factories × 9 machines) in Tableau, converting raw status logs into a quantified downtime metric to flag the highest-downtime factory and device type
- Classified employee pay-equity scores across roles into a 3-tier rubric (Fair/Unfair/Highly Discriminative) in Excel, then synthesized both analyses into forensic business conclusions

## ACADEMIC PROJECTS

**Customer Shopping Trends Analysis - Retail Analytics Project** | Python, SQL, Tableau

- Defined a business problem statement around customer segmentation and revenue drivers for a retail dataset of [3900] transactions across [4] product categories
- Cleaned and validated raw data using Python (Pandas), handling [37] missing values in the Review Rating column by imputing the median rating within each product category, producing an analysis-ready dataset.
- Loaded cleaned data into a SQL database and wrote [10] business-focused queries to answer questions on customer segments, seasonal spend trends, and category-wise revenue performance
- Built an interactive Tableau dashboard with [8] visuals/KPIs, surfacing that [35]% of revenue came from [Loyal customer segment/clothing category] - informing a specific recommendation
- Authored a formal project report and stakeholder presentation deck translating technical findings into business recommendations
- Published full project (code, queries, dashboard, report) to GitHub for portfolio review

**Blockchain Based Money Laundering Detection System** | Major Project - Academic Project

- Analysed simulated blockchain transaction data using structured, rule-based logic to identify patterns and flag anomalies on blockchain including detection of Rings, Layering, and SAR report generation.

## INDEPENDENT RESEARCH & INVESTMENT ANALYSIS - EXTRACURRICULAR

**Self-Initiated Venture**

2024 – Present

- Conducted independent investment research for over two years, critically evaluating complex, real-world data to make structured, evidence-based decisions
- Sustained self-discipline and consistency managing this long-term project entirely without external supervision
- Built resilience and adaptability by navigating market uncertainty and iteratively refining analytical frameworks under pressure
- Produced detailed written documentation, translating complex insights into clear, structured reports

## CERTIFICATIONS

IBM – Python 101 for Data Science | CognitiveClass.ai | June 2026

## EDUCATION

**B.Tech, Computer Science & Engineering** — SRM University, Sonipat

2022 – 2026

**Intermediate & Matriculation (CBSE)** — South Point Public School, Sonipat

2020 & 2022
